

TIGERCLEAN SERIES

A=air suction diameter 100 mm capacity 300 m³/h max.
 B=electric connection 400 V/3 phase/N/earth/50 Hz power 10 kW - 25 A
 D=waste water outlet diameter 50mm, 100mm above ground level capacity 11 ltr/min
 E=water connection 15mm connection 11 ltr/min supplied with reverse water protection

TigerClean screen developing machines provide the perfect solution for automating the screen developing process. The TigerClean developing series are fully automated systems that provide an excellent washout of a wide variety of designs from very fine to wide areas. TigerClean developing machines feature dual pressure rinse jets for the highest degree of reproducibility and dependable results.

TigerClean Reclaim Series Features:

- Fully automatic screen developing solution
- Closed process chamber eliminates water vapour in screen room
- Rubber flaps aid in screen drying process without damaging emulsion
- Highest safety and complete CE-safe
- Simple design and easy to use
- Heavy duty machines are rugged and consistently produce dependable quality screens
- Modular systems which can be upgraded when needed
- Environmentally friendly and provide safe working conditions for employees

TIGERCLEAN SCREEN RECLAIMING SERIES

The Inpro Tigerclean reclaiming systems offer the very best in automated screen cleaning solutions. The Inpro Tigerclean systems are modular built and so they can be tailored to the specific needs of each print shop. With safety, dependable quality and exibility being at the forefront of the engineering design, the Inpro Tigerclean screen reclaiming systems are a cost effective way to optimize the screen washing process. The Inpro Tigerclean series are the 3rd generation of fully automatic screen reclaiming machines and together with our A1 chemicals we can provide the customer with the best quality and solutions in machine and chemicals for all different applications.

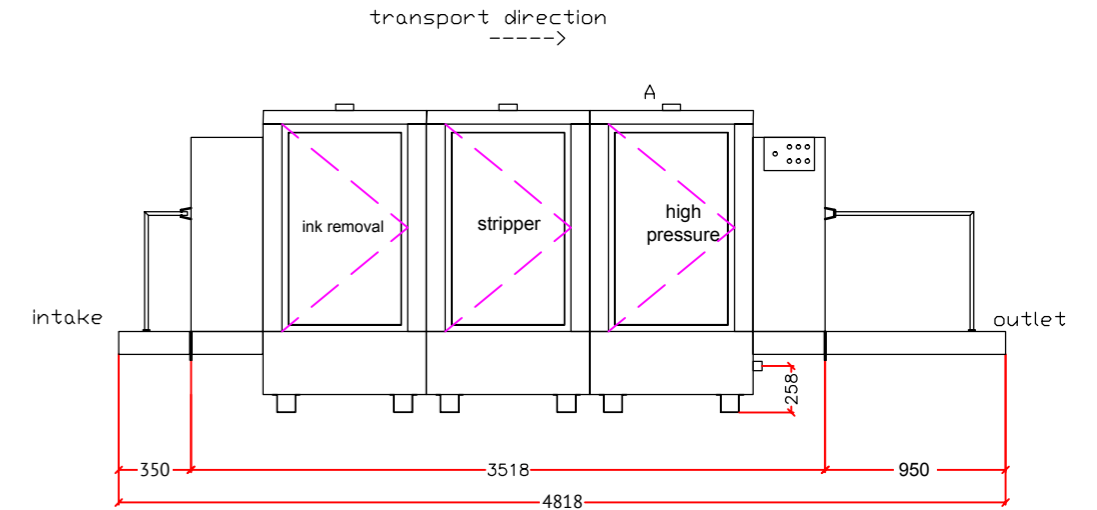

The Inpro Tigerclean Reclaim Series Features:

- Fully integrated screen reclaiming solution with ink cleaning, emulsion removal and high pressure washing
- Complete separation of cleaning modules to prevent cross contamination
- Highest safety and complete CE-safe
- Recycled chemical solutions reduce chemical consumption and cost
- Special new brush system in the ink removal module provide extra cleaning and removal power
- Minimized risk of ghost images
- Simple design and easy to use and maintain
- Heavy duty machines are rugged and consistently produce dependable quality screens
- Suitable for installation in production areas
- Environmentally friendly and provide safe working conditions for employees
- A range of fully automatic machines with up to 5 modules inclusive an integrated developing system
- Modular systems are custom designed and can easily be upgraded when needed

Please refer to the chart below for the maximum screen size allowed by the opening size for each model.

Model	Height (cm)
TC110-3	110
TC140-3	140
TC180-3	180
TC260-3	260

Other sizes on request.

- A=air suction diameter 100 mm capacity 300 m3/h max.
- B=electric connection 400 V/3 phase/N/earth/50 Hz power 10 kW - 25 A
- C=compressed air connection Max 6 Bar 300 ltr/min, air-hose 12mm only conditioned air
- D=waste water outlet diameter 50mm, 100mm above ground level capacity 11 ltr/min
- E=water connection 15mm connection 11 ltr/min supplied with reverse water protection
